Innovation in times of uncertainty

Possibilities on tap, regardless of the surrounding economic conditions.

In times of economic uncertainty, many companies choose to reduce investment in IT projects. Often this results in organisations losing ground to competitors, customer resentment due to perceived stagnation of products/services and lost opportunity cost – leaving protentional profits, customer acquisitions and progress on the table. Perhaps the question that should be asked is: Can you afford not to invest?

Full spectrum offering, from design to development to operations

At Enfo, we have decades of experience in helping our customers with value creation and innovation in both upturns and downturns. We have built an organization around this experience and expertise, packaged in a way that enables our customers to fine tune the teams delivering the business value that leads them to Enfo in the first place.

Keep on innovating

Digital innovation has exploded exponentially in the past two decades and digital products and services have become an everyday part of life. Consumers and businesses expect their needs to be serviced through digital means, regardless of industry or use case. The pace of innovation and change is relentless. To be standing on the side-lines, watching the race from afar, can be an existential risk in some industries and for some companies.

Enfo CODE have helped organisations of all sizes – from small, regional start-ups to global enterprises – continue the race to service their customers with modern, beautiful innovative products for 10+ years.

One of our key advantages in delivering innovation to our customers is our ability to offer a blended delivery model. With development expertise in Sweden and abroad, we can customize a team to suit all our customers' needs – from expertise, to competence, to cost. Flexibility is valuable, continued innovation is critical.

Friction-free

Customer service is front and centre in our relationship with our customers. It should be simple, smooth, and seamless working with us. We like to get to know our customers and understand their business needs and the needs of their customers. Our Customer Success Managers/SDM's ensure a dedicated person – a name, face, and phone number – is on hand to help every step of the way.

Technology

We live and breathe Cloud. With close partnerships with the major cloud vendors, multiple certified cloud engineers and developers and expertise from building numerous cloud-native applications, Enfo CODE know Cloud. We breath the Well Architected Framework – a best practice framework ensuring our customers solutions are built to be operated over time, secure, reliable, efficient, cost optimized and environmentally sustainable. We love technology and strive to ensure we are on the edge of innovation.

Support

We take pride in our work and the products we build. Building trust with our customers is at the centre of everything we do. Taking responsibility for our work is non-negotiable. We can help our customers in the way that works for them. From our team of Cloud Engineers working 24/7 365, to ensuring we maintain knowledge of a solution "just in case", we can find a model that works for your needs.

Pay as you go

No fixed cost, no long-term agreements (unless our customers request it!). No opaque pricing model that cannot be reverse engineered. As with the Cloud, we value a model built upon consumption, with transparency at every step. You should be able to calculate your costs before an invoice arrives.

Key benefits

- Continued innovation capabilities through intelligent cost management
- Rapid value creation – measured in days/weeks, not months/years
- Full spectrum offering, from design to development to operations

Blended delivery team

We are techno creatives, makers, and explorers. We design, craft, operate and improve beautiful yet powerful cloud native digital products and services for a better future. We are a team of distributed experts in all things cloud, design, and development – from ideation to operations. Our DNA, designed to ensure we use expertise regardless of location, is precisely what allows us to offer market competitiveness in times of economic uncertainty. This is the Enfo CODE Way. This is Blended Delivery. This is innovation on tap, regardless of the surrounding economic conditions.
